DESIGNER & FRONT-END DEVELOPER

PROFILE

I work at the seam between **visual design** and **front-end development**, where a brand, a campaign and a shipping website are treated as one continuous system rather than separate deliverables. Seven years turning briefs into fast, hand-coded websites and identities that actually perform — with a track record of long-term, repeat client relationships across the US, UK and Pakistan.

EXPERIENCE

- Founder & Lead Developer** 2024 — now
Premium Markup · Web Design & Development Agency
Design and hand-code fast, search-friendly websites and brand systems for small businesses. Every site built from scratch for speed, SEO and full client ownership — no page builders, no outsourcing.
- Brand, Web & Training Design** 1.5 yrs · ongoing
Security Compliance Academy · United States
Continuous 18-month relationship: brand identity, marketing graphics, training and course design, and the full website for a US security-training academy.
- Design & Front-End** ongoing
Confidential Security & Investigations · Georgia, US
Brand, website and marketing graphics for a US private-investigation firm — four months in and continuing.
- Security, Investigation & Training Brands** clients
P.I. Leadership Academy · Tyde Link · Azeura · Brisk & more
Long-term branding, full websites and social campaigns for firms across the US and UK.
- Freelance Web & Design** ongoing
Upwork & Fiverr · International
Websites, graphics and front-end for clients worldwide, with a steady record of repeat work and five-star delivery.
- Design & Front-End** collaboration
East West Soft · United Kingdom
Digital design and front-end work with a UK software team.
- Graphic Design Instructor** 4 years
Teaching graphic design
Four years teaching design fundamentals, tools and craft.

WHY WORK WITH ME

You talk to the person writing the code — no account managers, no juniors doing the real work. I bring a rare full-stack range (identity, campaign and shipping website in one hand), a history of long-term client trust, and a simple promise: fast, hand-coded work, delivered on a clear scope and fully owned by you.
